

WSO2 MI Architecture

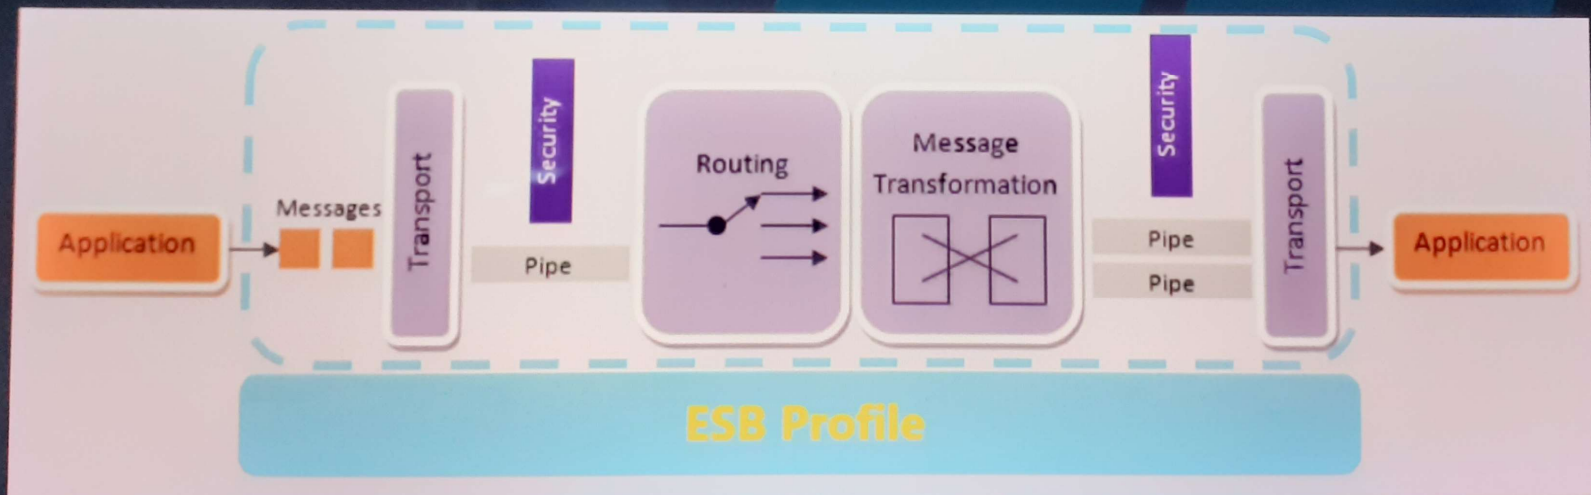

Webservice Overview

Web Service is an application accessible over the web that proposes a standard way in which the business applications are developed, integrated, and interoperated.

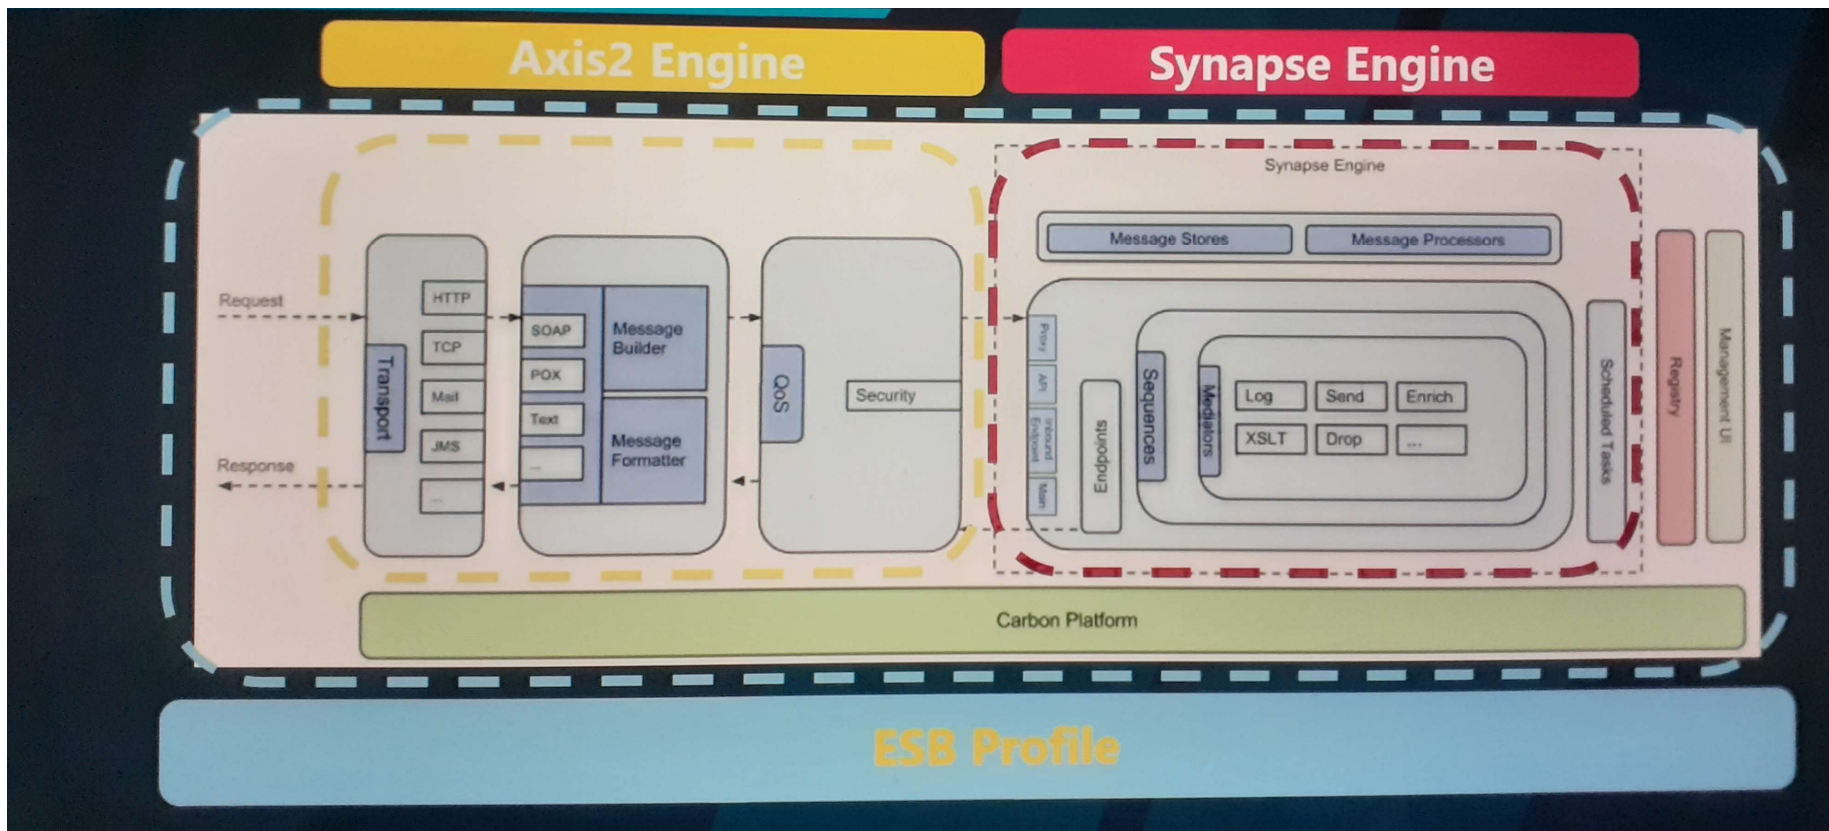

WSO2 Architecture

WSO2 MI is an open source product that provides an Enterprise Service Bus (ESB) profile, among other things.

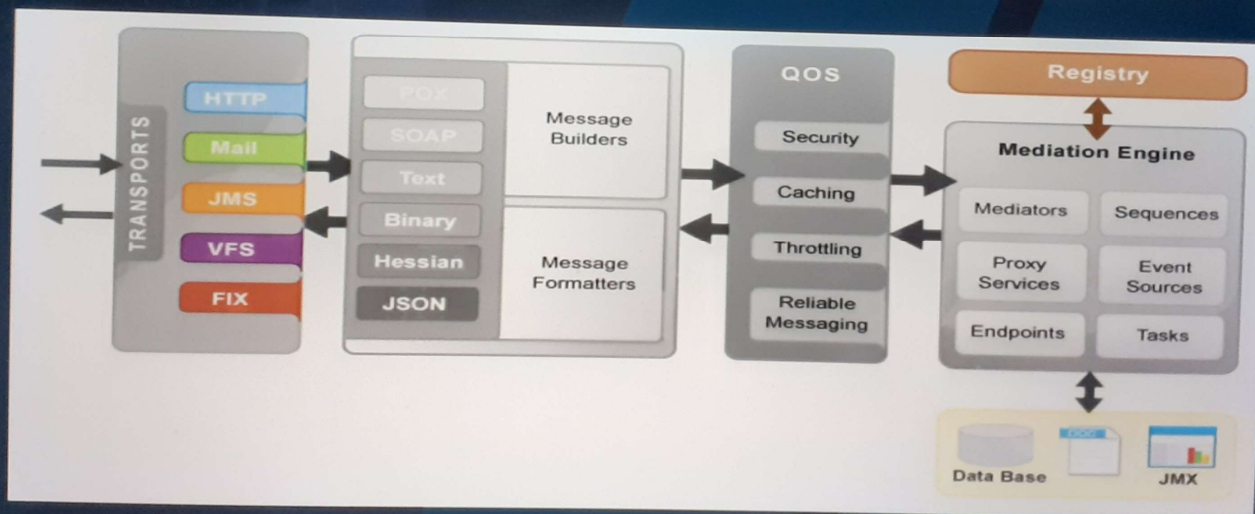

WSO2 Architecture

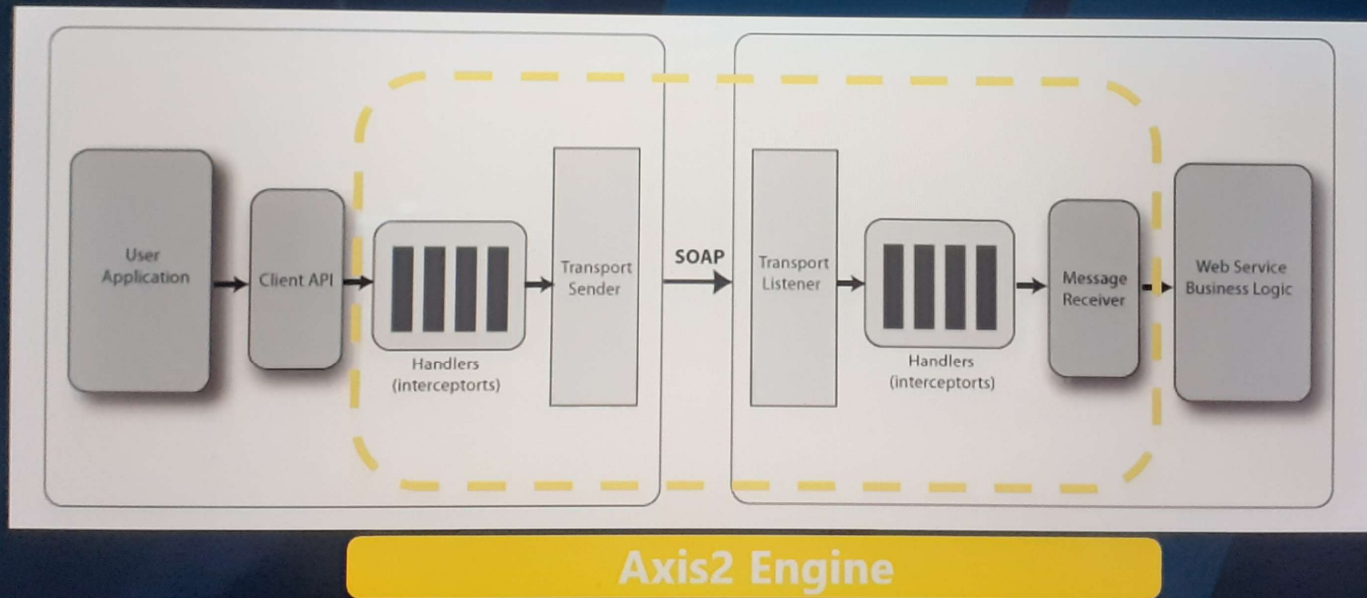

Synapse Architecture

Apache Synapse is the asynchronous mediation open source engine that powers the lightweight and high-performance Enterprise Service Bus (ESB) used by WSO2 MI.

Axis2 Architecture

Apache Axis2 is the Web Services engine that powers the Enterprise Service Bus (ESB) used by WSO2 MI.

Thank You!!
